OIL CONSERVATION COMMISSION

IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
COMMISSION FOR THE PURPOSE OF
CONSIDERING:

CASE NO. 10345 (De Novo)
ORDER NO. R-9581-A

APPLICATION OF BHP PETROLEUM
(AMERICAS), INC. FOR COMPULSORY
POOLING, SAN JUAN COUNTY, NEW MEXICO

RECEIVED
JUL 06 1992
OIL CON. DIV.
DIST. 3

ORDER OF THE COMMISSION

BY THE COMMISSION:

This cause came on for hearing at 9:00a.m. on March 12, 1992, at Santa Fe, New Mexico, before the Oil Conservation Commission of New Mexico, hereinafter referred to as the "Commission."

NOW, on this 29th day of June, 1992 the Commission, a quorum being present, having considered the testimony presented and the exhibits received at said hearing, and being fully advised in the premises,

FINDS THAT:

- (1) Due public notice having been given as required by law, the Commission has jurisdiction of this cause and the subject matter thereof.
- (2) Division Case Nos. 10345 and 10346 were consolidated at the time of the hearing for the purpose of testimony.
- (3) The applicant, BHP Petroleum (Americas), Inc. ("BHP"), seeks an order pooling all mineral interests in the Basin-Fruitland Coal Gas Pool underlying the W/2 of Section 23, Township 29 North, Range 13 West, NMPM, San Juan County, New Mexico, forming a standard 320-acre gas spacing and proration unit for said pool. Said unit is to be dedicated to its existing Gallegos Canyon Unit Well No. 390 located in Unit N of said Section 23.
- (4) The record of the examiner hearing on July 25, 1991 was incorporated into the record of this hearing.

(5) Louise Y. Locke dba Locke-Taylor Drilling Company ("Locke") owns the oil and gas leasehold rights from the surface to the base of the Pictured Cliffs formation underlying the N/2 of said Section 23, and has not agreed to pool her interest.

(6) The applicant owns the oil and gas leasehold rights as to the Basin-Fruitland Coal Gas Pool underlying the SW/4 of Section 23.

(7) All of Section 23 is within the Basin-Fruitland Coal Gas Pool which is governed by special rules and regulations as promulgated by Division Order No. R-8768, as amended. Said rules provide for 320-acre spacing and restricted well locations to either the NE/4 or SW/4 of a section.

(8) The applicant drilled its Gallegos Canyon Unit Well No. 390 at a previously approved unorthodox coal gas well location (Division Administrative Order NSL-2896, dated October 12, 1990) 245 feet from the South line and 1530 feet from the West line of said Section 23 in December, 1990 to a total depth of 1629 feet in order to test the Basin-Fruitland Coal Gas Pool.

(9) Louise Y. Locke appeared at the hearing through legal counsel in objection to both BHP applications filed in Case Nos. 10345 and 10346, including the orientation of the proration units.

(10) All of said Section 23 is within the Basin-Fruitland Coal Gas Pool which is governed by special rules and regulations as promulgated by Division Order No. R-8768, as amended. Said rules provide for 320-acre spacing and restricted well location requirements to either the NE/4 or SW/4 of a section.

(11) The SW/4 of said Section 23 is committed to the Gallegos Canyon Unit ("the GCU"), and the applicant is the sub-operator of the GCU as to formations from the surface to the base of the Pictured Cliffs formation, which includes the Fruitland Coal interval; thus the applicant as GCU sub-operator has the right to drill and operate the No. 391 well in the Basin-Fruitland Coal Gas Pool. Furthermore, the pattern of spacing units in the area is stand-up 320-acre units and the applicant has the right to orient the spacing and proration unit as a W/2 stand-up unit, as permitted by said Order No. R-8768, as amended.

(12) *Applicant requested a risk penalty of 150 percent, based upon risk penalties assessed by the Division in previous forced pooling cases in this pool. Mrs. Locke requested a risk penalty of 10 percent because BHP has already assumed the bulk of the risk by drilling before it consolidated her interest and offered her the opportunity to participate in the wells.*

The 156 percent penalty that the Division has applied in orders force pooling tracts in the Basin-Fruitland Coal Gas Pool is based on a penalty calculation presented by Meridian Oil, Inc. in prior cases involving the pooling of Basin-Fruitland Coal Gas interests. Unlike this case, the wells had not already been drilled, which further reduces the risk to the risk of completion. Applicant testified that 10 percent represented the mechanical risk of completion.

FINDING: Because BHP did not provide Mrs Locke with an authorization for expenditure and give her the opportunity to participate in the well, it assumed all risk of drilling; a risk penalty of 10 percent as the completion operations mechanical risk properly reflects the risk in this particular situation.

(13) Louise Y. Locke's correlative rights will be protected by the approval of this application because she will receive her proportionate share of production from the No. 390 well.

(14) To avoid the drilling of unnecessary wells, to protect correlative rights, to prevent waste and to afford the owner of each interest in said spacing and proration unit the opportunity to recover or receive without unnecessary expense his just and fair share of the gas in said pool, the subject application should be approved by pooling all mineral interests, whatever they may be, within said unit.

(15) The applicant should be designated the operator of the subject well and unit.

(16) Any non-consenting working interest owner should be afforded the opportunity to pay his share of estimated well costs to the operator in lieu of paying his share of reasonable well costs out of production.

(17) Any non-consenting working interest owner who does not pay his share of estimated well costs should have withheld from production his share of reasonable well costs plus an additional 10 percent thereof as a reasonable charge for the risk involved in the drilling of the well.

(18) Any non-consenting interest owner should be afforded the opportunity to object to the actual well costs but actual well costs should be adopted as the reasonable well costs in the absence of such objection.

(19) Following determination of reasonable well costs, any non-consenting working interest owner who has paid his share of estimated costs should pay to the operator any amount that reasonable well costs exceed estimated well costs and should receive from the operator any amount that paid estimated well costs exceed reasonable well costs.

(20) \$3300.00 per month while drilling and \$350.00 per month while producing should be fixed as reasonable charges for supervision (combined fixed rates); the operator should be authorized to withhold from production the proportionate share of such supervision charges attributable to each non-consenting working interest, and in addition thereto, the operator should be authorized to withhold from production the proportionate share of actual expenditures required for operating the subject well, not in excess of what are reasonable, attributable to each non-consenting working interest.

(21) All proceeds from production from the subject well which are not disbursed for any reason should be placed in escrow to be paid to the true owner thereof upon demand and proof of ownership.

(22) Upon failure of the operator of said pooled unit to recommence completion operations on the Gallegos Canyon Unit Well No. 390 on or before October 1, 1992, the order pooling said unit should become null and void and of no further effect whatsoever.

(23) Should all the parties to this force-pooling reach voluntary agreement subsequent to entry of this order, this order should thereafter be of no further effect.

(24) The operator of the well and unit should notify the Director of the Division in writing of the subsequent voluntary agreement of all parties subject to the force-pooling provisions of this order.

IT IS THEREFORE ORDERED THAT:

(1) All mineral interests, whatever they may be, in the Basin-Fruitland Coal Gas Pool, underlying the W/2 of Section 23, Township 29 North, Range 13 West, NMPM, San Juan County, New Mexico, are hereby pooled to form a standard 320-acre gas spacing and proration unit for said pool.

(2) Said unit shall be dedicated to the existing Gallegos Canyon Unit Well No. 390 located at the previously approved unorthodox coal gas well location (NSL-2896) 245 feet from the South line and 1530 feet from the West line (Unit N) of said Section 23.

(3) BHP Petroleum (Americas), Inc. is hereby designated the operator of the subject well and unit.

(4) Within 30 days after the effective date of this order the operator shall furnish the Division and each known working interest owner in the subject unit an itemized schedule of actual drilling and estimated well completion well costs.

(5) Within 30 days from the date the schedule of actual and estimated well costs is furnished to him, any non-consenting working interest owner shall have the right to pay his share of said well costs to the operator in lieu of paying his share of reasonable well costs out of production, and any such owner who pays his share of actual drilling and estimated well completion costs as provided above shall remain liable for operating costs but shall not be liable for risk charges.

(6) Any non-consenting working interest owner may, at least 45 days after receiving the schedule of actual well costs but not more than 90 days after such receipt, file with the Division an objection to such costs; if no objection to the actual well costs is received by the Division and the Division has not objected within the period from at least 45 to 90 days following receipt of said schedule, the actual well costs shall be reasonable well costs; provided however, if there is an objection to actual well costs within the aforesaid 45th to 90th day period, the Division will determine reasonable well costs after public notice and hearing.

(7) Within 60 days following determination of reasonable well costs, any non-consenting working interest owner who has paid his share of actual drilling estimated well completion costs in advance as provided above shall pay to the operator his pro rata share of the amount that reasonable well completion costs exceed estimated well completion costs and shall receive from the operator his pro rata share of the amount that estimated well completion costs exceed reasonable well completion costs.

(8) The operator is hereby authorized to withhold the following costs and charges from production:

- (A) The pro rata share of reasonable well costs attributable to each non-consenting working interest owner who has not paid his share of actual and estimated well costs within 30 days from the date the schedule of actual and estimated well costs is furnished to him; and

(B) As a charge for the risk involved in the completion of the well, 10 percent of the pro rata share of reasonable well completion costs attributable to each non-consenting working interest owner who has not paid his share of estimated well completion costs within 30 days from the date the schedule of actual and estimated well costs is furnished to him.

(9) The operator shall distribute said costs and charges withheld from production to the parties who advanced the well costs.

(10) \$ 3300.00 per month while drilling and \$350.00 per month while producing are hereby fixed as reasonable charges for supervision (combined fixed rates); the operator is hereby authorized to withhold from production the proportionate share of such supervision charges attributable to each non-consenting working interest, and in addition thereto, the operator is hereby authorized to withhold from production the proportionate share of actual expenditures required for operating such well, not in excess of what are reasonable, attributable to each non-consenting working interest.

(11) Any unleased mineral interest shall be considered a seven-eighths (7/8) working interest and a one-eighth (1/8) royalty interest for the purpose of allocating costs and charges under the terms of this order.

(12) Any well costs or charges which are to be paid out of production shall be withheld only from the working interest's share of production, and no costs or charges shall be withheld from production attributable to royalty interests.

(13) All proceeds from production from the subject well which are not disbursed for any reason shall be placed in escrow in San Juan County, New Mexico, to be paid to the true owner thereof upon demand and proof of ownership; the operator shall notify the Division of the name and address of said escrow agent within 30 days from the date of first deposit with said escrow agent.

(14) Should all the parties to this force-pooling reach voluntary agreement subsequent to entry of this order, this order shall thereafter be of no further effect.

(15) The operator of the subject well and unit shall notify the Director of the Division in writing of the subsequent voluntary agreement of all parties subject to the force-pooling provisions of this order.

(16) Jurisdiction of this cause is retained for the entry of such further orders as the Division may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.
