RE: *Injection Pressure Increase
Sunco Disposal No. 1
"E" 02-29N-12W
San Juan County, New Mexico*

RECEIVED
JAN 28 1993
OIL CON. DIV. 1
DIST. 3

Dear Sir:

Reference is made to your request dated January 15, 1993, to increase the surface injection pressure on the Sunco Disposal Well No. 1. This request is based on step rate tests conducted on the well on January 14, 1993. The results of the tests have been reviewed by my staff and we feel an increase in injection pressure on the well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well:

WELL AND LOCATION

**MAXIMUM INJECTION
SURFACE PRESSURE**

Sunco Disposal Well No. 1
1595' FNL & 1005' FWL
"E" 2-29N-12W

~~1050-2910~~

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

William J. LeMay
Director

WJL/DC/jc
