Richardson Operating Company

Downhole Commingling Application

The ROPCO 8-1 is a recently drilled Basin Fruitland Coal/Twin Mounds Fruitland Sand – Pictured Cliffs well. This well is part of Richardson's 2001 development program.

Pursuant to Order R-11363, Richardson Operating Company seeks approval to downhole commingle the "Pre-approved pools and areas": Basin Fruitland Coal (71629) and Twin Mounds Fruitland Sand – Pictured Cliffs (86620) pools in this well.

The Basin Fruitland Coal formation is perforated at 562' – 564', 614' – 622' and 666' – 676'. The Twin Mounds Fruitland Sand – Pictured Cliffs formation is perforated at 670' – 680' in this well.

Due to the intermingled nature of the pools and since neither pool has enough data to prepare a reliable production forecast or predict the ultimate reserves, Richardson Operating proposes to allocate the production on a 50/50 basis:

Pictured Cliffs Production = $\frac{1}{2}$ x Total Production.

Fruitland Coal Production = $\frac{1}{2}$ x Total Production.

The downhole commingling will not reduce the value of the total remaining production of this well.

Ownership between the two pools is not identical.

Richardson Operating Company has sent notice to all interest owners in the spacing units by certified mail (return receipt) of their intent to apply for downhole commingling and no objection was received within 20 days of sending the notice.

A copy of this application has been submitted via Sundry Notice Form 3160-5 to the Bureau of Land Management.

Your consideration and approval of this application is appreciated.
