Dear Jack:

Our records indicate that the #2 Bruce Sullivan well about which we have recently been corresponding was drilled, casing was cemented and perforated and the well was Sand-oil fractured and the perforations subsequently squeezed off.

We are enclosing a supply of Form C-105, which is our completion form. We would appreciate it if you could fill in all pertinent data on this form and return to us so that we can show the well as completed. The plugging bond on the well could not be cancelled until such time as the Notice of Intention to plug has been filed and approved and the well plugged according to Oil Conservation Commission regulations. At present our records do not indicate the well has ever been plugged.

If the present operator intends to re-complete the well at a later date, please indicate on Form C-105.

Yours very truly

Dear Emery:

The #2 R. Bruce Sullivan well located in Unit L, Section 30-29N-10W was never completed by our company. A dispute arose over the method of completing and the well was ultimately sold to Mr. A. E. McLane, 1900 Mercantile Dallas Building, Dallas 1, Texas.

We are not familiar with the exact status of this well, but would like to execute whatever papers considered necessary to relieve Mr. R. E. Jackson as operator and to help us cancel bond on same.

Very truly yours,
