Rosa Unit

Farmington, New Mexico April 27, 1960

Well No. 33 is located 950 ft. from S line and 900 ft. from E line of sec. 22

SE/4 SE/4 of Section 22 T-31-N R-4-W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

----- Wildcat ----- Rio Arriba ----- New Mexico -----
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 7220 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

As a result of not obtaining gas in commercial quantities, Rosa Unit No. 33 was plugged and abandoned as follows on April 22, 1960:

1. Filled 2-3/8" tubing.
2. Spotted 50 sacks cement plug in 5-1/2" casing 3945' - 4272' and squeezed with 1000 psi.
3. Filled hole with fluid.
4. Pumped 50 sacks cement plug in 5-1/2" - 8-5/8" annulus and squeezed with 550 psi.
5. Removed well head and surface equipment.
6. Spotted 5 sacks of cement for surface plug (0-40') and erected dry hole marker.
7. Plug and abandonment by above procedure to permit possible future re-entry in the event other zones are discovered to be productive in the area.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
