A trailer has been moved out to the Rosa Unit #203 to protect field personnel from the elements.

The wells and disposal facility are being checked in the very early part of the day making it convenient to provide a refuge during the cold weather. Currently the facilities are checked three times a week. The frequency of visits will change as needed to maintain well production.

As noted above the trailer is being used only as a convenience to make the job a little easier. Should you desire the trailer will be moved from BLM land at the first available opportunity.
