13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Plans are to add the MV interval to the existing DK well and then commingle production from both zones per DHC Order 11363. A sundry detailing the DK forecast will be filed before actual commingling occurs. A brief detail of the procedure we will be using is as follows:

MIRU. COOH w/production tubing. Isolate existing DK interval with bridge plug. PT casing and remediate with cement if casing fails pressure test. Run GR/CCL/CBL remediate with cement if the interval completing isn't adequately covered. Perforate and stimulate the Mesaverde intervals. Remove bridge plug and return well to production with the Mesaverde and Dakota intervals commingled. May flow test the MV before commingling occurs.

A workover pit will be used during the workover and will be lined and fenced. Once the workover is complete the pit will be closed. Attached is the C102 for the Mesaverde zone.

14. I hereby certify that the foregoing is true and correct.
