13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We request continued temporary abandonment status for this well. The Dakota formation was tested and plugged on October 6, 1993. Currently a sales line to this well is unavailable. Seasonal closures in the Rosa Unit will prevent work during the winter. Williams Production Company plans to evaluate this well for recompletion to the Mesaverde formation in 1997, along with our 1996 drilling program.
