Rosa Unit #9A  
1250' FNL, 2245' FWL  
Section 11, T31N R6W  
Rio Arriba, NM  
Blanco Mesa Verde

**RECEIVED**  
MAR 13 1996**OIL CON. DIV.**  
**DIST. 3**

Dear Mr. LeMay,

This is a request on behalf of Williams Production Company for administrative approval for a non-standard gas location in the Blanco Mesa Verde pool for the referenced well.

The well is staked at the top of a relatively level ridge which slopes sharply to the west into Navajo Lake. Section 11 is slightly larger than normal so this proposed location is 400' from the middle of section 11. The proposed spacing unit is the west half of Section 11, T31N, R6W, which is 320 acres.

All of the legal locations in the N/2 NW/4 contained concentrated archaeological sites and artifacts. An alternate location was staked 270' FNL and 2380 FWL. This is also a Non-Standard location and it is extremely close to the Rosa Unit Com #148 which was recently completed in the Mesa Verde pool in the SW/SE of section 2.

As the Unit Operator of the Rosa Unit, Williams Production is the only offset operator. Attached is a plat indicating the well location and proposed spacing unit and a topographical map of the area.

Thank you for your consideration and approval of this application. If you have any questions please do not hesitate to call upon me.

Sincerely,

Paul C. Thompson, P.E.  
President, Walsh Engineering
