Cage Federal
Well No. #1 is located 990 ft. from [N] line and 1650 ft. from [E] line of sec. 33NE 1/4 Section 23 30N 10W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)Artes PC San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)The elevation of the derrick floor above sea level is 6118 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

PROPOSED WORKOVER: Propose to move in cable tool rig, pull 1" tubing, clean out hole, rerun tubing and complete.

JUSTIFICATION: Well was fractured 10-27-55. Produced on tubing until 4-8-56. Produced on casing during test short work in 1956. All attempts to flow or backflow through tubing have failed. Well fluids are currently being unloaded through the casing once a week with large quantities of gas being vented. Well is currently unable to make its allowable because liquids cannot be unloaded properly through the casing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operation and be commercial.
