DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The above well was plugged and abandoned on August 11, 1957. Following is how this well was plugged and abandoned from total depth to surface.

1. Squeezed perforations 10,766-10,788 with 100 sacks of cement.
2. Squeezed perforations 10,655-10,700 with 100 sacks of cement.
3. Squeezed perforations 10,592-10,640 with 100 sacks of cement.
4. Squeezed perforations 10,505-10,529 with 100 sacks of cement.
5. Squeezed perforations 10,107-22, 10,176-200 with 100 sacks of cement.
6. Sealed off zone 10,024-10,086 with heavy mud and bridge plug set at 10,015.
7. Sealed off zone 9945-10,006 with heavy mud and bridge plug set at 9935.
8. Squeezed perforations 9570-9660, 9720-9760 with 100 sacks of cement.
9. 5 1/2" casing cut off at 6388' and 1470' of 5 1/2" casing was pulled. Spotted 75 sacks of cement in 5 1/2" casing stub. Cemented 5 1/2" casing at 6926' with 125 sacks of cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
