(State or Territory)

The elevation of the derrick floor above sea level is 5674 ft. (ungraded ground)

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We plan to set approximately 125' of 10" casing and approximately 2150' of 7" 20# seamless casing on top of Pictured Cliffs formation; drill in with cable tools and shoot with approximately 140 qts. SNG; run 2 1/2" tubing and complete for production.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
