San Juan  
(County or Subdivision)

New Mexico  
(State or Territory)

The elevation of the derrick floor above sea level is 6054 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to approximately 5300 feet. Rotary tools will be used to total depth. Casing will be set on top of Cliffhouse. Mesa Verde formation will be drilled with gas and shot with SNG.

The following casing program is proposed:

Size	Depth	Cement	Remarks:
<u>10 3/4"</u>	<u>450</u>	<u>445</u>	<u>175%</u> of calculated amount of circulate
<u>8"</u>	<u>4300</u>	<u>800</u>	<u>150%</u> of calculated amount to fill 3900' above shoe.

Copies of location and elevation plats are attached. Also attached are detailed staking plats. A copy of any survey taken will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
