DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

Well was spudded August 31, 1951. 248' of 10-3/4" casing was cemented with 250 sacks on September 4, 1951, with cable tools.

Rotary tools moved on, plug was drilled and casing tested with 500# pressure for 30 minutes with no drop in pressure.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
