Re: Communication Test, El Paso Natural Gas Company
Sunray G #1, M-7-30N-10W

Dear Mr. Cutler:

The annual packer leakage test which was conducted on the above well between November 5, 1968, and November 19, 1968, indicates that there is communication between the producing zones in this dually completed well.

Will you please take immediate remedial action to separate the producing zones as specified by the order authorizing this dual completion?

Yours very truly,

Emery C. Arnold
Supervisor, District #3
