Re: #1 Pease-Miles Balock Well

Dear Sir:

In connection with the well No. 909-32, drilled Sept. 32, 1956, we
filled out a hole to 1000 feet and then re-drilled the well line and
1000 feet to the bottom line of Jan. 9, 1957. Total cost,
\$1000.00. The well was completed by filling the
well with oil and gas. The oil and gas were at 100% of
API gravity. The oil was taken from the well above the
gas separator. The gas separator was located at the top of the well and
the oil was taken from the bottom of the well. The oil was
taken from the bottom of the well.

The well was completed on the oil well, producing
oil and gas. The oil and gas were at 100% of
API gravity. The oil was taken from the well above the
gas separator. The gas separator was located at the top of the well and
the oil was taken from the bottom of the well.

Very truly yours, *[Signature]*

Re: #1 Perfect-Airline Boeing Model

Dear Sir:

On January 23rd, 1921, we
will be in touch with you at
Boeing Model 1001 to see if
you would like to have
one of our new
models. We will be happy
to show you how
it compares with
the other models
now available.
We will also be happy
to show you how
it compares with
the other models
now available.
We will also be happy
to show you how
it compares with
the other models
now available.

Yours very truly,
The American Eximiner, Inc.
