(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The well was producing 1 bbl oil and 8 bbl water per day from Gallup perms 1022-1060'. Since the well was not economical to operate, it was shut in during July 1974. Cumulative production is 27,443 bbl oil.

This well is in a large Unit which is now under waterflood operations. Future plans are to conduct waterflood and tertiary recovery studies. These studies may result in a revised waterflood plan or in a tertiary recovery program that may require the use of this well in order to recover the maximum amount of oil from the Gallup formation.

2cc: New Mexico Oil Conservation Commission

TEMPORARY ABANDONMENT

EXPIRES

JUN 1 1977

18. I hereby certify that the foregoing is true and correct
