	This well was shut in during June 1970 because the production supported by the well made it uneconomical to operate. This well is in a large Unit which is now under waterflood operations. Future plans are to conduct waterflood and tertiary recovery studies. These studies may result in a revised waterflood plan or in a tertiary recovery program that may require the use of this well in order to recover the maximum amount of oil from this reservoir.					
	U.S.G.S. app	proval to shut in v	well June 25	, 1970.
