**King Oil Company, Joella #1X, H-05-30N-17W, 30-045-09997**

**12-16-96** Cut off open ended dry hole marker that was leaking oil and water. Found 1 1/2" tbg. cemented inside csg. Dug around csg. with backhoe to approx. 15' and will cut csg. tomorrow.

**12-17-96** Welded a 2" collar to csg. below cement @12'. Csg. is bubbling small amount of gas and water. Drilled a 1/4" hole through the collar and a 1" valve to relieve pressure below cement. Shut down until tomorrow and let gas vent overnight.

**12-18-96** Checked status of csg. There was a very small amount of gas and water present. Cut csg. off and extended the csg. to the surface. Installed a swedge and valve and shut in csg. Checked for water flow several days later and found none. Will continue to monitor well for any leaks and will add well to list for P&A with reclamation fund.
