Blanco Pictured Cliffs

San Juan

New Mexico  
(State & Territory)

The elevation of the derrick floor above sea level is 5920 ft.

DETAILS OF WORK

(State names of all expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to change plans on surface casing as follows:

8 5/8" at 280' with 155 sks. cement circulated to surface.

2 7/8" at 2700' w/160 sacks cement to cover 100' above Fruitland

The NW/4 of Section 28 is dedicated to this well.

I understand that this plan of work must receive approval in writing by the Geological Survey, before operations may be commenced
