RE: Remediation at the Bobbie Herrera #1, K-4-30N-11W, 30-045-23338

Dear Mr. Hartman:

The New Mexico Oil Conservation Division recognizes that Manana has remediated the blowdown area on the Bobbie Herrera #1 to within the guideline standards provided for spills and pits. This documentation is shown in a report submitted by Blagg Engineering dated May 20, 1998. Please note the error in spelling the well name "Bobbie" not Bobby and the well is in Township 30 North not 29 North. The initial excavation and sampling on April 8, 1998 did not meet the standards as shown by laboratory analysis for BTEX subsequent field testing after additional excavation on April 14, 1998 did meet the guidelines using the Field Headspace method, reading 96.4 ppm.

Yours truly,

Denny G. Foust
Environmental Geologist
