Should waivers from all offset operators not accompany an application for administrative approval, the New Mexico Oil Conservation Commission will hold the application for a period of twenty (20) days from date of receipt by the Commission's Santa Fe office. If, after said twenty day period, no protest nor request for hearing is received by the Santa Fe office, the application will then be processed.

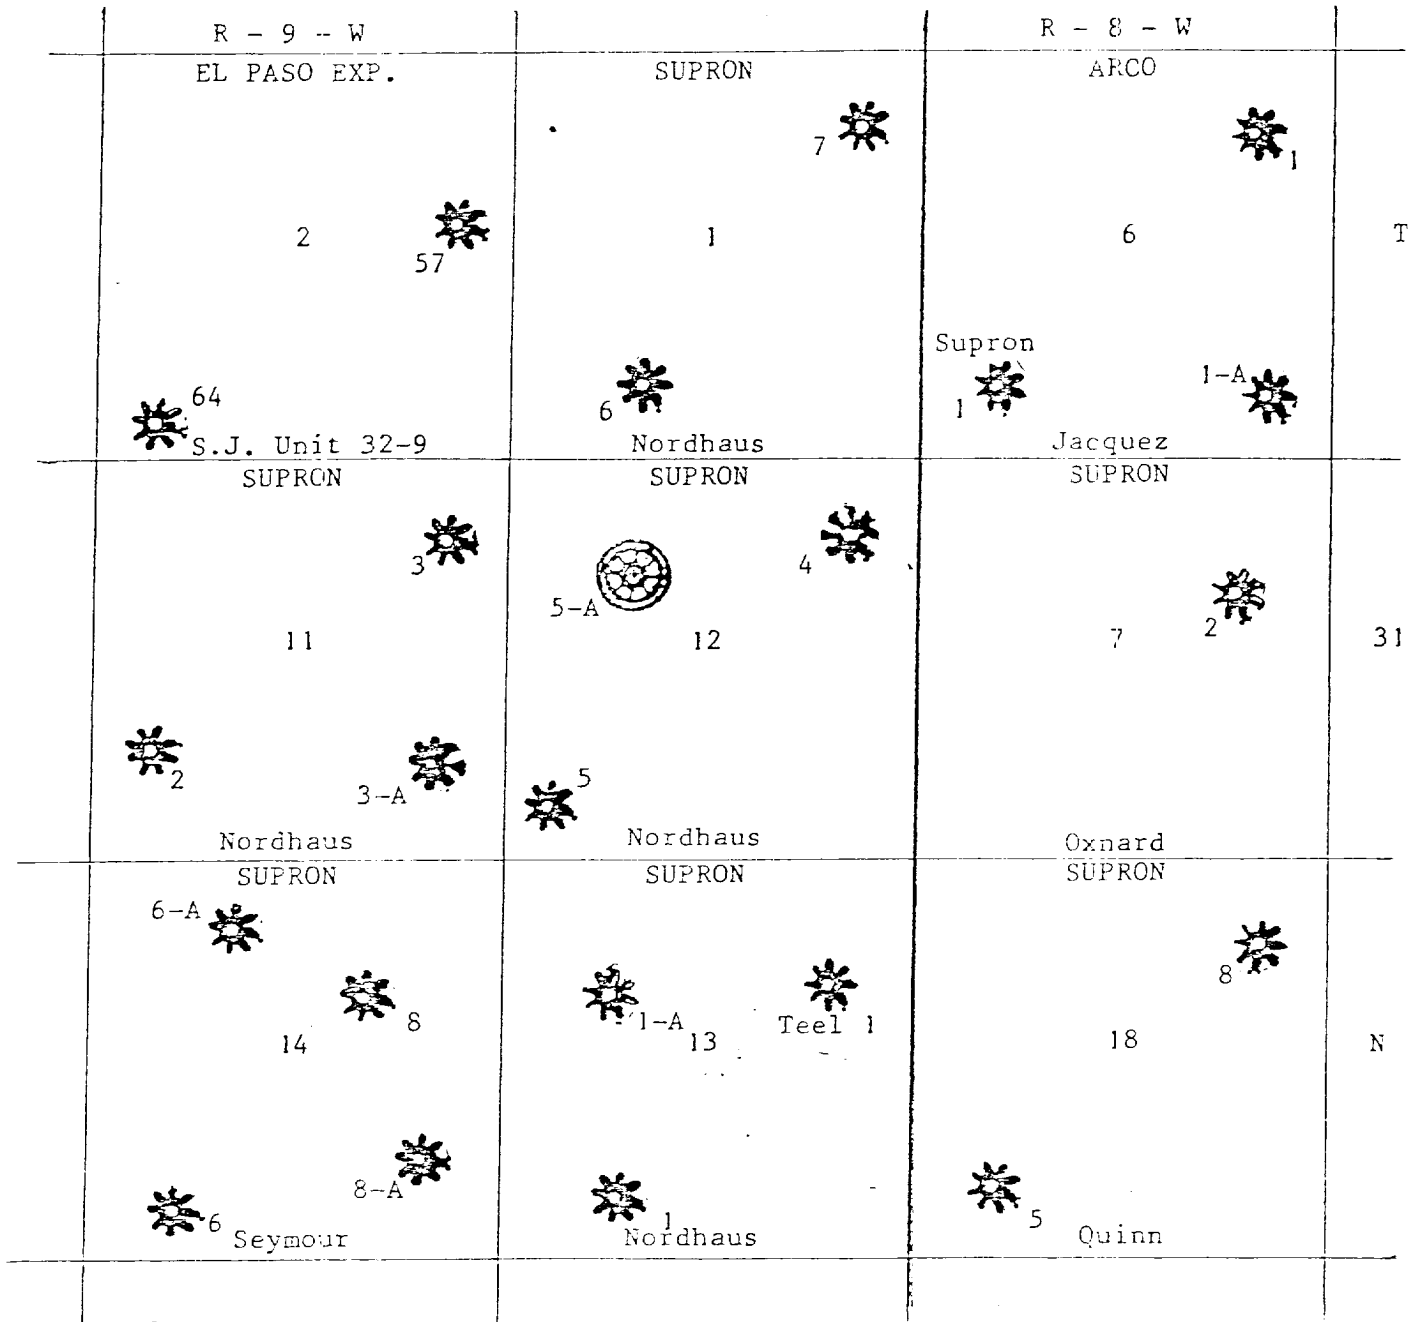

NOTE: If the proposed multiple completion will result in an unorthodox well location and/or a non-standard perforation unit in one or more of the pools, an application for approval of the same should be filed simultaneously with this application.

Marvin Kruschke, being first dually sworn according to law upon his oath deposes and says:

That he is of lawful age and has full knowledge of the facts herein below set out.

That he is employed by Baker Packers in the capacity of Office Manager and as such as its authorized agent.

That on April 14, 19 81, he personally supervised the setting of a 5-1/2" Baker Model R-3 Double - Grip Packer in Supron Energy Corporation's
(Make and Type of Packer) (Operator)

Nordhaus Well No. 5-A, located in Unit
Letter "F", Section 12, Township 31 North, Range 9 West
N.M.P.M., San Juan County, New Mexico.

That said packer was set at a subsurface depth of 7789 feet, said depth measurement having been furnished by John Walters

That the purpose of setting this packer was to effect a seal in the annular space between the two strings of pipe where the packer was set so as to prevent the commingling, within the well-bore, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as to prevent any movement of fluids across the packer.
