Re: Oxnard #3A P-08-31N-8W

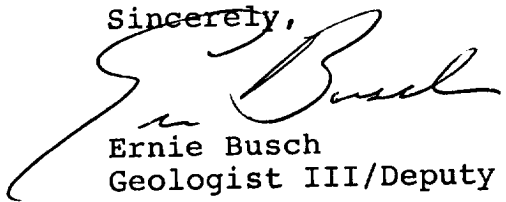

Dear Mike:

Your recommended allocation of commingled production to the referenced well is hereby approved as follows:

	<u>Gas</u>
Mesaverde	92%
Dakota	8%

If you have any questions, please contact this office.

Sincerely,

  
Ernie Busch  
Geologist III/Deputy Oil & Gas Inspector

Mr. Frank Chavez  
New Mexico Oil Conservation Division  
1000 Rio Brazos Road  
Aztec, New Mexico 87410

Dear Frank,

We have reviewed the gas production on our Oxnard #3A (P-Section 8-T31N-R8W, San Juan County, New Mexico) which is a commingled Dakota-Mesaverde, as per NMOCD Order No. DHC-619. Based on the current and cumulative production from the Dakota and Mesaverde intervals in the subject well, we feel that the following production allocation on the well's commingled zones would be reasonably accurate:

<u>GAS</u>	
Dakota	8%
Mesaverde	92%

Please let us know if this percentage allocation meets with your approval.

Sincerely,

P. M. Pippin  
Production Engineer
