13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Please refer to your letter dated August 7, 1998, wherein you requested our plans for this well.

We request approval for continued long term shut in of this well. It is still prohibitively remote from pipelines to enable connection and production at current gas prices. We plan to connect and produce this well when pipelines build closer and/or gas prices improve.

This well is capable of production, as shown in our June, 1994 production test.

We also request that the casing integrity test requirement be waived. The rationale for this request is in a letter from Ken Townsend to Bayless dated June 13, 1994, and is still valid.

THIS APPROVAL EXPIRES JUL 01 1999
