San Juan County, New Mexico

Gentlemen:

The above referenced well is a Chacra/Mesaverde commingle. Attached is a copy of the allocation for the commingling of the subject well completed on December 28, 2000. DHC-2817 was issued for this well.

Gas:	Chacra	61%
	Mesa Verde	39%

Oil:	Chacra	0%
	Mesa Verde	100%

These percentages are based upon remaining reserves assigned to each formation founded on production from the respective formations before and after the recompletion of the Chacra. Because condensate production did not change with the addition of the Chacra formation, the condensate is completely allocated to the Mesaverde formation. Please let me know if you have any questions.

Sincerely,

Peggy Cole
Regulatory Supervisor
