12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) See Rule 1103.

Devon Energy was unable to remove the un-cemented Fruitland Coal 5.5" liner as planned after 20 days of rig activity. On 10/18/00 Devon requested and was granted verbal approval to side-track and re-drill the open hole Fruitland Coal interval.

Top of PC at 3243', top of Fruitland at 2853' (correlation from offset well), 7" casing shoe at 2929'. The original open hole TD was at 3243'. The bottom of the 5 1/2" liner (fish) at 3241' and top of fish at 3109'.

First side-track information: 7" bridge plug set at 2915', 3 degree whipstock at 2905' with window top at 2899'. Drilled side-track with 6 1/4" bit. No reverse drilling break at top of PC. New TD at 3323' which was 80' into PC formation. Plug back to top of PC with 5 cement bailer runs for a total of 2.62 bbls of cement. On fifth bailer run tagged fill and cement at 3240'. Open hole collapsed around bailer. Could not pull bailer free and had to cut wireline and leave tool in hole. Bailer tool and cement conditions combined to make hole un-fishable.

Second side track information: Contacted Steve Hayden with OCD for verbal approval. 7" bridge plug set at 2882' Set whipstock with gyro at 2875' with a 3 degree kickoff angle. Kickoff direction was 214 degrees. Top of window at 2870'. New side-track TD at 3252' (MD). Bottom hole deviation of 6 degrees.

11/11/00 ran 5 1/2" un-cemented, pre-drilled liner. Liner shoe at 3252', Baker JGS hanger at 2808'. 101 joints of 2 3/8" tubing. Purge valve @ 3232'. This well is equipped with rods and pump. On 11/12/00 pressure tested 7" casing to 1500 psig and passed.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
