13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

ARCO Oil and Gas Company respectfully requests permission to lay a temporary sales gas line to a Williams Field Services meter run located at ARCO Jacquez #1. Unit Letter A, 990' FNL & 990' FEL, Sec. 6, T-31N, R-8W, San Juan County, NM. This pipeline would be two inch Schedule 40 welded pipe approximately 580' long.

The temporary pipeline would lay on the surface down the West side of the existing roadway and would not disturb any new ground. ARCO had laid a temporary fuel supply and a gas sales line at this same location when the well was tested in January of 1990. The gas was sold to Northwest Pipeline at that time.

Presently, we are waiting on MOGI to lay a permanent line into this location. ARCO does not know when MOGI will get their pipeline laid but could begin selling gas to Williams Field Services as soon as temporary line could be laid.

See attached topo map. Black line is roadway - broken red line would be temporary pipeline.
