☐ Abandonment

☐ Recompletion

☐ Plugging Back

☐ Casing Repair

☐ Altering Casing

☒ Other Recavitate well

☐ Change of Plans

☐ New Construction

☐ Non-Routine Fracturing

☐ Water Shut-Off

☐ Conversion to Injection

☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

This well was drilled in 1990 and completed in 1991. A 4-1/2" 11.6# uncemented liner was run during completion operations. Plans are to pull the tubing and liner, cleanout to TD, recavitate the coal interval, possibly run an new 4-1/2" liner, perforate, land tubing and return to production. A brief description of the work planned is as follows:

MIRU. Install BPV & ND tree. NU & test BOP. Retrieve BPV. POOH w/tubing. Pull 4-1/2" liner. RIH w/bit on 3-1/2" DP & cleanout to TD. PU and recavitate coal interval. POOH. It's hasn't been decided if a liner will be run back in hole, but if it is, they will run new 5-1/2" 15.5# liner with hanger & packer. Set liner on bottom. Set hanger and packer. If required RU wireline and perforate liner. RIH with tubing and land. Set BPV. ND BOP & NU & test tree. Retrieve BPV and return well to production.

A 25' X 60' lined (3 sided fenced) pit will be utilized during workover as well as a blow down pit.

14. I hereby certify that the foregoing is true and correct
