13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Texakoma proposes to install approximately 2220' of 4" steel pipeline to connect the Federal 8 #3 well to an existing compressor located at the Federal 8 #1 well (see attached survey). The pipeline route has been carefully selected to follow existing roads and pipeline ROW's such that there will be no incremental disturbance of new land. An archaeological report has been previously submitted recommending approval of this pipeline. The line will have a wall thickness of .156" and a pressure rating of 1970 psi. It will be pressure tested to 300 psi, and normal operating pressure will be 50 psi. Reclamation plans are to re-seed the disturbed area and to install water bars to minimize or eliminate future erosion. Surface ownership of the entire pipeline route is on the same federal lease.
