PRIVACY ACT

The Privacy Act of 1974 and the regulation in 43 CFR 2.48 (3) provide that you be furnished the following information in connection with information required by this application.

AUTHORITY: 30 U.S.C. 181 et seq., 351 et seq., 25 U.S.C. et seq.; 43 CFR 3160.

PRINCIPAL PURPOSE: The information is to be used to evaluate the actual operations performed in the drilling, completing and testing of a well on a Federal or Indian lease.

ROUTINE USES: (1) Evaluate the equipment and procedures used during the drilling and completing/recompleting of a well. (2) The review of geologic zones and formation encountered during drilling. (3) Analyze future applications to drill in light of data obtained and methods used. (4) (5) Information from the recorded and/or the record will be transferred to appropriate Federal, State, local or foreign agencies, when relevant to civil, criminal or regulatory investigations or prosecutions.

EFFECT OF NOT PROVIDING INFORMATION: Filing of this report and disclosure of the information is mandatory once a well drilled on a Federal or Indian lease is completed/recompleted.

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.) requires us to inform you that:

This information is being collected to allow evaluation of the technical, safety, and environmental factors involved with drilling and completing/recompleting wells on Federal and Indian oil and gas leases.

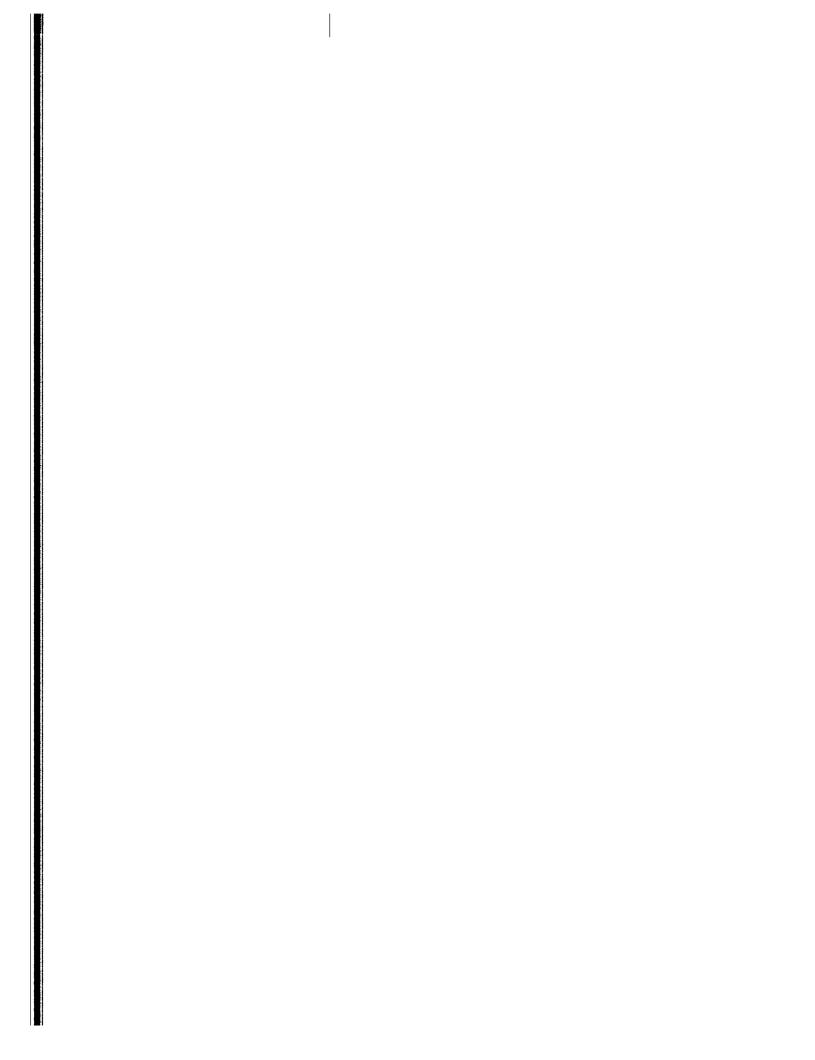

This information will be used to analyze operations and to compare equipment and procedures actually used with those proposed and approved.

Response to this request is mandatory only if the operator elects to initiate drilling and completing/recompleting operations on an oil and gas lease.

BLM would like you to know that you do not have to respond to this or any other Federal agency-sponsored information collections unless it displays a currently valid OMB control number.

BURDEN HOURS STATEMENT

Public reporting burden for this form is estimated to average 60 minutes per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of this form to U.S. Department of the Interior, Bureau of Land Management, Bureau Clearance Officer, (WO-630), MS 401 LS, 1849 C Street, N.W., Washington, D.C. 20240, and the Office of Management and Budget, Interior Desk Officer (1004-0137), Washington, D.C. 20503.

ROBERT L. BAYLESS, PRODUCER LLC

FLOYD #7

955 FNL & 980 FWL (NWNW) SECTION 17, T30N, R12W SAN JUAN COUNTY, NEW MEXICO

COMPLETION REPORT

Rigged up Blue Jet Wireline Service. Run GR-CLL-CBL from corrected PBTD of 2133 ft to surface. Had good cement bond across Fruitland Coal perforation interval. Top of cement is 390 ft. Rigged up Halliburton. Pressure tested casing and frac valve assembly to 3000 psi, held OK. Perforated the Fruitland Coal interval with 3 1/8" casing gun as follows:

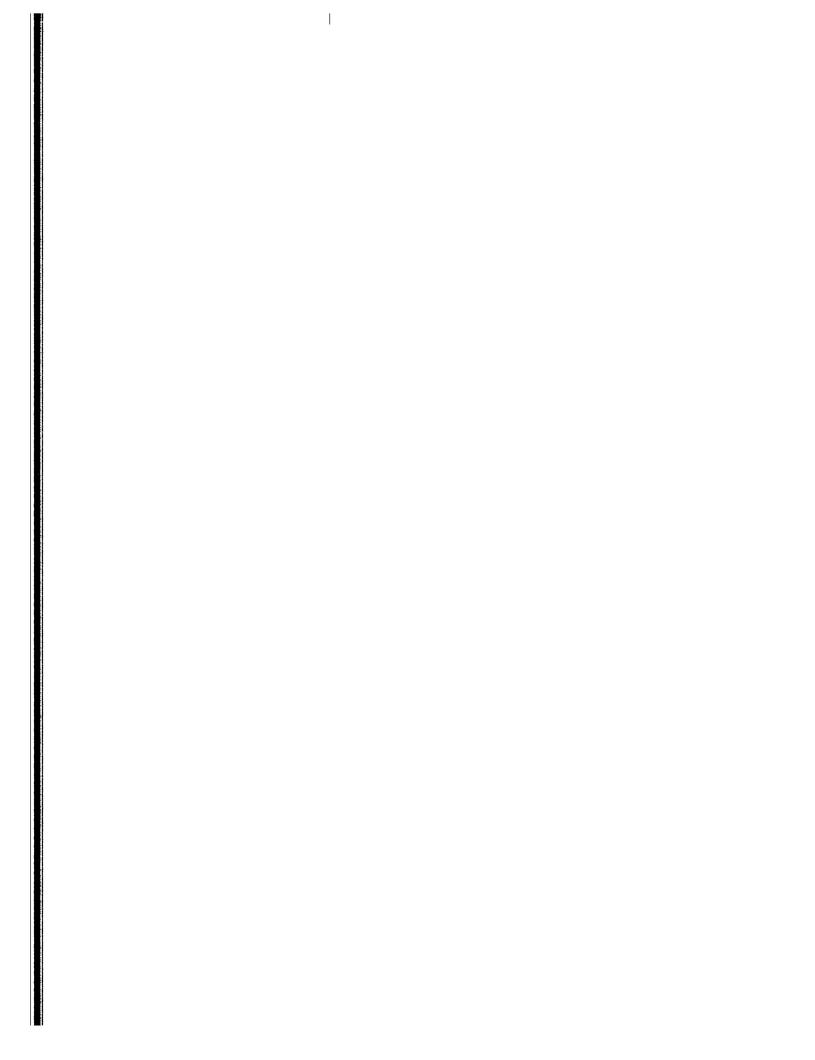

2001 - 2019 18 ft 72 holes .34" diameter

Rigged up Halliburton. Fracture Stimulated the Fruitland Coal interval down the casing with 56,000 gallons of 25# and 20# Delta 140 & Sand Wedge system containing 146,500 lbs of 20/40 Brady sand as follows:

1,000 gals of 10% Formic acid spearhead	4.5 bpm @ 800 psi
· · · · · · · · · · · · · · · · · · ·	
6,000 gals of 25# Delta Frac 140 pad	42 bpm @ 2100 psi
2,000 gals of 25# Delta Frac 140 w/.25 ppg sand	42 bpm @ 2050 psi
2,000 gals of 25# Delta Frac 140 spacer	42 bpm @ 2100 psi
2,000 gals of 25# Delta Frac 140 w/.50 ppg sand	42 bpm @ 2050 psi
3,000 gals of 25# Delta Frac 140 spacer	42 bpm @ 2000 psi
6,000 gals of 20# Delta Frac 140 w/1 ppg sand	42 bpm @ 1800 psi
6,000 gals of 20# Delta Frac 140 w/2 ppg sand	42 bpm @ 1600 psi
8,000 gals of 20# Delta Frac 140 w/3 ppg sand	42 bpm @ 1200 psi
8,000 gals of 20# Delta Frac 140 w/4 ppg sand	42 bpm @ 1100 psi
7,000 gals of 20# Delta Frac 140 w/5 ppg sand	42 bpm @ 1050 psi
6,000 gals of 20# Delta Frac 140 w/6 ppg sand	42 bpm @ 1000 psi
1,300 gals of 20# Water Frac G flush	42 bpm @ 1050 psi

ISIP was 450 psi, decreasing to 380 psi after 15 minutes. Average rate was 42 bpm. Average pressure was 1500 psi with maximum pressure of 2100 psi and minimum pressure of 1000 psi. Sand contained 60 mc Ir192 radioactive tracer material. Approximate load fluid to recover is 1424 bbls. Shut well in. Shut down for the night.

6/13/02 Well did not have any pressure on it this morning. Moved in and rigged up JC Well Service completion rig. Nipple down frac valve. Nipple up wellhead and BOP. Pick up notched collar and 2 3/8" tubing. Tagged sand fill in well at 1985 ft (16 ft of sand fill above perforations). Circulated 148 ft

of sand from hole to PBTD of 2133 ft. Rigged up Blue Jet Wireline Service. Ran GR tracer survey log from PBTD to 1500 ft. After-frac log showed Fruitland Coal perforated interval was treated very well. It also showed the frac grew downward about 5 ft below bottom perforation, meaning just the top part of the Pictured Cliffs formation had RA material in it. Landed tubing in BOP and rigged to swab. Made 9 swab runs and shut down for the night.

Well did not have any pressure on it this morning. Rigged to swab. Made 41 total swab runs and recovered an estimated 70 barrels of water. Fluid level was staying constant about 500 ft from bottom of tubing. Tubing had a slight blow after each swab run, and the annulus pressure built up to 100 psi. Blew down annulus pressure. Tagged sand fill with tubing at 2128 ft, indicating 5 ft of sand above PBTD. Tripped tubing out of hole. Tripped in hole with pumping bottom hole assembly on tubing and landed as follows:

<u>Description</u>	<u>Length</u>	<u>Depth</u>
KB to landing point	2.00	0 – 2
2 tubing subs	14.28	2 – 16
63 jts of 2 3/8" 4.7#/ft J55		
EUE yellow band tubing	1985.79	16 – 2002
1 seating nipple	1.10	2002 - 2003
1 tubing sub	8.10	2003 - 2011
1 pump and X overs	16.11	2011 – 2027
1 torque anchor	1.60	2027 - 2029
1 jt of 2 3/8" tubing	<u>31.80</u>	2029 - 2061
_	2060.78	

Nipple down BOP. Nipple up wellhead. Trip in hole with rods as follows:

<u>Description</u>	<u>Length</u>	<u>Depth</u>
KB to landing point	0.00	0 - 0
1 1 1/4" Polished rod (4 ft out)	18.00	0 - 18
4 pony rods	20.00	18 - 38
79 7/8" rods	1975.00	38 - 2013
1 pump stater	14.00	2013 - 2027
	2027.00	

Released rig. Job complete. Wait on surface equipment for pumping.
