U. S. GEOLOGICAL SURVEY
FARMINGTON, N. M.

Farmington, New Mexico July 20, 1953

Well No. 2 is located 260 ft. from N line and 260 ft. from W line of sec. 35

SW 1/4 of Section 35 T-22-N R-5-N NMPH
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat Rio Arriba New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6320 ft. (Ungraded ground)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Please disregard our Notice of Intention to Drill, approved June 1, 1953, as the well location has been changed to the above.

We propose to drill the above well to approximately 6500 feet. Rotary tools will be used to total depth. Casing will be set on top of the Mesaverde formation. If stimulation is necessary the pay will be shot open with SAG and clean out will be with cable tools.

The following casing program is proposed:

Size	Depth	Weight
10-3/4"	900'	900
7"	5600'	300

Copies of location plate attached. A copy of any survey taken will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
