May 1, 1963

La Plata Gathering System, Inc. - San Juan 32-5 Unit

Well No. **1-X-19** is located **1,680** ft. from **N** line and **734** ft. from **E** line of sec. **19**

Lot 3 - Section 19 32-North 5-West N.M.P.M.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Blanco M.V. & Basin Dakota Rio Arriba County New Mexico  
(Field) (County or Subdivision) (State or Territory)

RECEIVED

MAY 1963

The elevation of the derrick floor above sea level is **6,310** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

March 28, 1963. Test of Dakota Formation - 7794'-7874' through .750 choke showed "choke volume" of 102 MCF/D.

No Aof calculated. The Test report signed by Lewis D. Galloway of El Paso Natural Gas Company bears the notation: Flow rate determined from Thornhill-Craver Co. Dwg. No. 700EM for Non-critical flow through a positive flow bean. Surging flow, avg. taken as 102 MCF/D. Well blew fairly dry gas for two hours. At end of three hour test, the flow was surging and producing heads of water, such that accurate volume measurements were impossible.

U. S. GEOLOGICAL SURVEY  
FARMINGTON, NEW MEXICO

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
