San Juan 32-5 Unit

January 5, 1962

Well No. **2-24** is located **2,310** ft. from **N** line and **1,550** ft. from **E** line of Sec. **24**
NE/4 Section **24** T **32-N** R **6-W** N.M. P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Basin Dakota-Blanco M.V. **Rio Arriba** County **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **6,320** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It has been determined that this well will not be productive from the Dakota formation, and it is desired to complete as a Mesa Verde well.

Dakota will be squeezed off with 50 sacks of cement at interval 8020-7770 feet, and ~~artificially~~ cast iron bridge plug set at 5750 feet.

Mesa Verde will be perforated and sand fractured at points indicated by logs.

Tubing will be run for production from Mesa Verde formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
