13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

On September 22, 1995 the pressures were checked on this well. Tubing had 33 psig and casing had 1,305 psig. Bradenhead had 0 psig.

These pressures indicate that there is not a casing leak on the well. We still hope to do further work to the well to make it productive, however such work cannot take place until market conditions improve. We will continue to check pressures regularly and report them on sundry notices.
