13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

After consultation with BLM personnel, it is our intention to set a bridge plug at 7,600' and test the integrity of the casing. If the casing is found to be leaking, we will identify the location of the hole(s) and cement squeeze as necessary. Treated water will be left in hole so that regular checking of the casing can be facilitated. We plan to eventually drill this hole deeper out from under the current casing or side track through a window in the casing.

We plan to have this work completed by October 1, 1996.
