13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Please reference telephone conversation on May 17, 2002, between representatives of BP America and Steve Mason, BLM and Charlie Perrin, NMOCD, regarding bringing various inactive wells into compliance.

BP is in the process of re-evaluating the production potential in the entire Carracas Canyon Unit.

The subject well will most likely need artificial lift in order to maintain production. Equipment has not arrived for installation therefore, we request additional time to finish the field wide evaluation and installation of the surface equipment necessary to restore production. In order to bring the well into compliance pending the installation of surface equipment we have proceeded to perform a casing integrity test as follows:

06/13/2002 MIRUSU NDWH & NUBOP. TOH W/prod. TBG. TIH & tag fill @ 4000'. Pressured CSG to 4000'. Held OK. TOH. TIH & land Prod TBG @ 3963' ND BOP. NUWH. Well TA pending further evaluation. Pressure Charts submitted to NMOCD.

THIS APPROVAL EXPIRES NOV 01 2002

14. I hereby certify that the foregoing is true and correct.
