13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Plan to use a lined reserve pit for drilling fluids instead of a closed mud system as approved in the Permit to Drill.

United States Forest Service has made an on-site inspection and verbally approved the proposed change. Revised Exhibit C, Location Layout, and Exhibit D, showing elevations/cut/fill, are attached.

The reserve pit will be constructed from dirt and earthen materials on and around the location which is on Federal Forest land. The cuttings and drilling fluids will be contained/disposed of in the reserve pit.
