The elevation of the derrick floor above sea level is **6,666** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Supplementing notice dated August 2, 1960 - Mesa Verde formation will be protected by setting two-stage collar - and cementing Mesa Verde with approximately 200 sacks of cement.

If conditions warrant both Mesa Verde and Dakota formations will be perforated - and if commercial production is obtained from both formations, well will be dually completed to produce from both formations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
