DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We propose to drill a well at the above location with rotary tools to an approximate total depth of 2000'. 100' of 8-5/8" O.D. 2 1/4" J-55 surface casing will be set and cemented to surface. Should the well prove productive a 5-1/2" O.D. 1 1/4" H-40 oil string will be used. This well is to test the producing possibilities in the Gallup formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
