Navajo  
Well No. 31 is located 639 ft. from NE line and 2036 ft. from SE line of sec. 31  
SE SE Sec. 31 31 N 16 W N.M.P.M.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Horseshoe Gallup San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the ground surface above sea level is 538.2 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

No commercial quantities of oil or gas were found in this well. As it could later be used as a water source well from greater depths, it is only being temporarily abandoned. Verbal permission was granted, to temporarily abandon this well, by a U. S. G. S. District Engineer. To abandon, the hole was left full of 9.0# mud and an 8-5/8"x2" swage was screwed into the 8-5/8" surface casing and a 2" plug valve was installed on top of this swage.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
