If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and sones pertinent to this work.) ARCO Oil and Gas respectfully requests approval of temporary abandonment status on this well. At this time, under the current waterflood operation, ARCO cannot economically justify remedial work. An ongoing study to determine the feasibility of CO2 flooding for the Horseshoe Gallup field is underway which may yield significant additional oil recovery. Implementation of a CO2 flood would require the workover of existing wells and the drilling of new wells. For this reason, ARCO proposes that this well be maintained in the temporarily abandoned status so that the wellbore will be available should it be needed as part of a future CO2 flood. This plan eliminates the economic waste of potentially usable wellbores and promotes conservation. Your letter dated January 2, 1987 requesting that this well be plugged within 60 days is attached for your information. 。 通常连续物件的合同性 MAR 02 1987 OIL CON. DIV. Durange, Colorado DIST_3 18. JAN 2 1987

CERTIFIED--RETURN RECEIPT REQUESTED

ARCO Oil and Gas Company 1816 East Mojave Farmington, New Mexico 87401

Dear Sir:

On December 4, 1986, an inspection was made by Mr. Steve Graham of the Bureau of Indian Affairs and Mr. Terry Galloway of the Bureau of Land Management on the Horseshoe Gallup Unit concerning compliance with a letter sent to ARCO Oil and Gas on December 18, 1985 (enclosed). No compliance had been done on any of the items listed in the BIA letter.

The Bureau of Land Management requests that the restoration requirements listed in the December 18, 1985 letter be completed within 60 days of receipt of this letter, with the exception that the underground piping does not need to be removed. However, all above ground piping associated with the abandoned wells must be removed.

Failure to comply with the requirements of this letter within the time specified will incur an assessment under 43 CFR 3163.3(a) and may also incur Civil Penalties (43 CFR 3163.4).

If you have any questions, contact Terry Galloway of my staff at (303) 247-4082.

Sincerely yours,

David J. Miller
Area Manager

 - Well 1186, Section 35, Township 31 North, Range weeky remove the concrete pad, all trash on mention and around the location, and seed the location.
 - Well 175, Section 26, Township 31 North, Range weedy, no anchoral 16 West, remove all trash on and around the location, and seed the location.

- Well #184, Section 35, Township 31 North, Range weeky to enclose 16 West, remove all trash on and around the location, and seed the location.
- Well #194, Section 34, Township 31 North, Range wash, sanchors, 16 West, remove anchors, all trash on and around the location, and seed the location.
- 16 West, remove all trash on and around the location, and seed the location.
- 16 West, remove the concrete pad, all trash on constraint and around the location, and seed the location.
- Well \$207, Section 35, Township 31 North, Bange weeky, no anchore 16 West, remove all trash on and around the location.
- Well #196, Section 35, Township 31 North, Range rocky.
 16 West, seed the location.

Underground Pipelines

Remove all underground pipeline serving the above abandoned wells which will no longer be needed.

Seeding

Seed all locations, the abandoned underground pipeline, rights-of-way and all service roads which will no longer be used or needed with the following mix:

- 1 lb Indian Rice Grass
- 1 lb Western Wheat Grass
- 1 1b Crested Wheat Grass
- 1 lb Winter Fat
- 불 1b Sandrop Seed Grass
- 为 1b Yellow Sweet Clover

Seed in the late fall or winter at the rate of 8 lbs. per acre by disking the ground to be seeded and drilling the seed in at a depth not to exceed 1/4 inches, or a brillion seeder/packer may be used.

Please advise this office of your plans concerning the power lines serving the abandoned well locations. If you need additional information, please feel free to contact Mr. Thomas E. Taylor, at 303/565-8471.

Sincerely, T

(SGD) OMAR BRADLEY
