DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Rotary drilling equipment will be used to drill to approximately 100' to the formation. If production is found, casing will be set and cemented with standard cement of cement. Water and mud will be used in drilling. There will be tested and complete logs will be run prior to setting casing or abandonment. Production treatments may be employed in completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
