1000 RIO BRAZOS ROAD  
AZTEC, NEW MEXICO

March 19, 1964

Union Texas Petroleum Co.  
Suite B-400, 1740 Broadway  
Denver 2, Colorado

Gentlemen:

11-50-21-9

The annual deliverability testing schedule on file in this office indicates that your Union Texas Johnston #4 well is now on deliverability test and will have the shut-in pressure measured on Monday, March 23, 1964. We are conducting a pressure study in this area and are requesting that bottom hole pressures be measured on this well at the time the surface pressure is determined.

Please have your local representative contact us by telephone when these pressures will be measured Monday in order that we may have a witness present.

Yours very truly

Emery C. Arnold  
Supervisor, District #3

OIL CONSERVATION COMMISSION  
1000 RIO BRAVO ROAD  
ALBANY, NEW MEXICO

ALBANY, N.M., 1954

Dear Sirs:  
Reference is made to your letter of the 11th instant regarding the proposed drilling of a well in the Rio Bravo area.

Very truly yours,

The proposed well is located in the Rio Bravo area, which is a part of the Rio Bravo National Monument. The Commission has received your application for a permit to drill a well in this area. The Commission is currently reviewing your application and will advise you of its decision as soon as possible.

The Commission is also reviewing the proposed drilling of a well in the Rio Bravo area. The Commission is currently reviewing your application and will advise you of its decision as soon as possible.

Sincerely,  
[Signature]

Very truly yours,  
[Signature]
