 Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Our records on this well are incomplete. We are unable to determine whether or not an application was ever made for permission to measure the gas off the lease on which it is produced. It is our understanding that the meter was originally installed off the lease because the gas stream was too hot to get an accurate measurement.

The wellhead is on lease no. SF 078439 and is located in Section 33, Township 31N, Range 9W. The meter is on lease no. NM 013685 and is located in Section 27, Township 31N, Range 9W.

We hereby request permission to continue measuring the gas with the meter at its present location.

Attached are drawings of the complete installation and also a topo map of the area.
