## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On July 5, 1957, 5 1/2" casing was set at 2565' with 100 sacks of cement. After waiting on cement for 10 days, casing was tested with bailing test which held O.K. On July 18, 1957, this well was sand-oil fracked with 40,000 gallons oil, and 40,000 pounds sand, using 275 gallons Tret-O-Lite F-72 in frac fluid. Average injection Rate 61BPM.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
