This well was producing approximately 1/2 BOPD and was not economical to operate. The well was shut in 4-30-67. U.S.G.S. approval to shut in this well was received 5-8-67.

This well is in a large Unit which is now under waterflood operations. Future plans are to conduct waterflood and tertiary recovery studies. These studies may result in a revised waterflood plan or in a tertiary recovery program that may require the use of this well in order to recover the maximum amount of oil from this reservoir.
