DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Ute Mountain Tribal "C" Well No. 4 was plugged and abandoned as follows on March 10, 1960, as a result of not obtaining oil or gas in commercial quantities:

1. Spotted 50 sacks cement plug in 5-1/2" casing 2977-3442.
2. Filled hole with fluid.
3. Pumped 50 sacks of cement down 5-1/2" - 8-5/8" annulus to another pipe.
4. Removed wellhead and surface equipment.
5. Spotted 5 sacks of cement for surface plug (0-40") and erect dry hole marker.
6. Plug and abandonment operations by above procedure to permit possible re-entry for future secondary recovery purposes.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
