Ute Mountain Tribal "C"

Farmington, New Mexico January 4, 1961

Well No. 1 is located 2260 ft. from S line and 550 ft. from W line of sec. 27
NW 1/4 SW 1/4 of Section 27 T-31-N R-15-W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Verde Gallup **San Juan** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5466 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

As a result of Ute Mountain Tribal "C" Well No. 1 ceasing to produce oil in commercial quantities, we propose to plug and abandon well as follows:

1. Move in pulling unit and pull rods and tubing.
2. Spot 25 sacks cement plug on bottom (approximately 120' of fill-up inside casing to 2319') and squeeze with minimum pressure to leave open hole and perforations covered with cement.
3. Fill hole with fluid.
4. Pump 25 sacks cement down 3-1/2" - 2-5/8" annulus (approximately 140' fill-up).
5. Remove well head and surface equipment.
6. Spot 5 sacks cement for surface plug (0-40) and erect abandonment marker.
7. Above procedure to permit possible re-entry for future secondary recovery purposes.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
