DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The Ute Mt. Tribal 2-29 #4 was spudded on Dec 1, 1958. 8-5/8" casing was set at 107' with 100 sx of neat cement. The casing was tested with 1000 psi water pressure before the cement was drilled and found to be good. A 7-7/8" hole was then drilled to 3855' and 5 1/2" casing was set at that point with 275 sx of neat cement in two stages. The stage collar was set at 2268'. The casing was tested above and below the stage collar with 1500 psi water pressure and found to be good. A 4 1/2" hole was then drilled to the TD of 4024'. At present the rotary rig is being moved off the hole prior to fracing the well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Title Field Foreman

1. The first part of the document discusses the importance of maintaining accurate records of all personnel movements and activities. It emphasizes the need for thorough documentation to ensure the integrity of the data and to facilitate future analysis.

2. The second part of the document outlines the procedures for collecting and organizing the data. It provides detailed instructions on how to format the records and how to ensure that all necessary information is captured.

3. The third part of the document describes the methods for analyzing the data. It includes a discussion of the various statistical techniques that can be used to interpret the results and to identify trends and patterns.

4. The fourth part of the document discusses the importance of maintaining the confidentiality of the data. It provides guidelines for how to handle sensitive information and how to ensure that it is not disclosed to unauthorized personnel.

5. The fifth part of the document discusses the importance of maintaining the accuracy of the data. It provides guidelines for how to check for errors and how to correct them.

6. The sixth part of the document discusses the importance of maintaining the completeness of the data. It provides guidelines for how to ensure that all necessary information is captured and that no data is lost.

7. The seventh part of the document discusses the importance of maintaining the consistency of the data. It provides guidelines for how to ensure that the data is collected and recorded in a uniform manner.

8. The eighth part of the document discusses the importance of maintaining the reliability of the data. It provides guidelines for how to ensure that the data is accurate and that it can be trusted.

9. The ninth part of the document discusses the importance of maintaining the validity of the data. It provides guidelines for how to ensure that the data is relevant and that it can be used to answer the research questions.

10. The tenth part of the document discusses the importance of maintaining the integrity of the data. It provides guidelines for how to ensure that the data is not tampered with and that it remains in its original form.

11. The eleventh part of the document discusses the importance of maintaining the security of the data. It provides guidelines for how to ensure that the data is protected from unauthorized access and that it is not lost or destroyed.

12. The twelfth part of the document discusses the importance of maintaining the transparency of the data. It provides guidelines for how to ensure that the data is accessible and that it can be used by others.

13. The thirteenth part of the document discusses the importance of maintaining the accountability of the data. It provides guidelines for how to ensure that the data is properly managed and that it is used for its intended purpose.

14. The fourteenth part of the document discusses the importance of maintaining the sustainability of the data. It provides guidelines for how to ensure that the data is maintained over time and that it is not lost or destroyed.

15. The fifteenth part of the document discusses the importance of maintaining the flexibility of the data. It provides guidelines for how to ensure that the data can be used for a variety of purposes and that it is not limited to a single use.
