Astec, New Mexico October 16, 1961

Well No. 19-6 is located 1930 ft. from N line and 6030 ft. from W line of sec. _____

Section 19 31 North 14 West R.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Verde Valley San Juan New Mexico
(Field) (County or Subdivision) (State)

The elevation of the Ground above sea level is 9638 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mud logs, cementing points, and all other important proposed work)

It is proposed to pull casing and plug the subject well. A 30-inch plug will be set covering the open hole and approximately 30' of casing. A 30-inch plug will be set covering the stub on the cut-off portion of the pipe. A 15-inch plug will be set covering the end of the surface casing. A 5-inch plug will be set on surface for a monument. In the event we are unable to pull any casing the casing will be filled with sand from the bottom plug to the surface plug. Cement will be pumped down the casing between the surface pipe and production pipe to prevent surface water encroachment.

The production from this well is now safe.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
